

IN THE SPECIFICATION:

Please amend the Specification on page 8, lines 22-26, to page 9, lines 1-4, as follows.

The first motor 10 and the second motor 20 are disposed side by side so as to be in parallel to each other on both sides (left-and-right side) with respect to the central axis of the arm 53. The first motor 10 and the second motor 20 are disposed so that the output axis of each of the first motor 10 and the second motor 20 is directed in an ups-and-downs direction. In this embodiment, the first motor 10 and the second motor 20 are respectively positioned in the right side and left side of the central axis of the arm 53.
